BlueLine jumbo light, **NEW**

With the BlueLine jumbo light 3.500 BlueSky Automotive presents the new, economic AdBlue® fuelling system as an alternative to the IBC, or as a weather-proof solution for medium-sized and smaller fleets. The BlueLine jumbo light is completely outdoor-suitable, and has all necessary permits for operation in Germany. Compile your own BlueLine jumbo light according to your requirements, choose from a variety of features. It is important for BlueSky to be able to offer an extremely good value, but fully functioning and efficient fuelling system—and all for an attractive starting price. The BlueLine jumbo light replaces the not weather-proof IBC and enables you to dispense AdBlue in a controlled manner. Connect your BlueLine jumbo light to your fuelling machine, let the filling level be checked by BlueSky and refilled before it runs dry! All with-

out administrative effort on your behalf.

As the complete BlueLine –fuelling systems series, the BlueLine jumbo light is also an extremely durable and sturdy system.

The BlueLine jumbo light is equipped with the proven pump technology. The calibratable version additionally has an automatic hose furl, an automatic fuelling pistol and a price calculator.

Also available with 5.000 litre capacity.

Other sizes upon request. We are happy to advise you
